Professional Summary

Cross-platform Mobile Developer with production experience building and releasing **iOS, Android, and web applications**. Experienced in **Flutter, Firebase, GCP, Supabase**, backend integrations, subscription systems, push notifications, localization, monitoring, and App Store / Google Play release processes. Interested in fintech products, digital banking, API-driven platforms, and scalable mobile/web product development.

Core Skills

Primary Stack: Flutter, Dart, Firebase, GCP, Supabase, React, Vite

Backend & APIs: Cloud Functions, Edge Functions, Firestore, PostgreSQL, SQL, REST APIs, Webhooks, Database Triggers

Fintech-Relevant: Subscription Flows, Entitlement Workflows, Google Play Billing, App Store Server Notifications, Google Play RTDN

Mobile Systems: FCM, Push Notifications, Localization, Crashlytics, Monitoring, App Store Connect, Play Console

Architecture & Delivery: Bloc, Provider, MobX, CI/CD, Secrets Management, Production Release Management

Professional Experience

Mobile Application Developer

MaviPiksel İnternet Çözümleri Ltd. Şti

Jan 2025 – Present

Izmir, Turkey

- Delivered **Sano AI: Health Assistant** for iOS and Android using **Flutter, Firebase, and GCP**.
- Engineered **subscription, entitlement, and payment-related backend workflows** across Google Play Billing and App Store Server Notifications using Google Play RTDN, Pub/Sub, Cloud Functions, and webhooks.
- Built **chat.sanoapp.ai**, the Sano AI web application, using **React and Vite**; established CI/CD, environment configuration, and secrets management from scratch.
- Supported Sano AI growth to **3,000+ Google Play downloads**, **2,000+ App Store downloads**, and **150K+ App Store impressions**, while maintaining **99.9%+ crash-free users** and a **4.7/5 rating**.
- Built and launched **Revna: AI Skin Routine Coach**, an AI-powered skincare routine coach published on App Store and Google Play.
- Developed **API-driven mobile features** with Flutter, including guided flows, user state management, reminders, localization, and privacy-first user controls.
- Implemented production backend workflows with **Supabase, Edge Functions, PostgreSQL / SQL, Database Triggers**, and REST-style integrations.
- Managed mobile release processes across **App Store Connect and Google Play Console**, including store listing preparation, review requirements, production builds, and post-release updates.
